Sussex Tech clinic offers training and dental care

Sussex Technical High School has opened a dental clinic, to provide training for students in its dental services and technologies program. The clinic will be open to Sussex Tech students two hours a week.

The clinic will provide examinations, x-rays, dental cleanings, and fillings to students. A licensed volunteer dentist will donate time and services to the clinic. There is no charge for students receiving these services in the dental clinic.

The dental clinic is a teaching facility for dental services and technologies students. Students in this career-technical area will assist during procedures and take x-rays as they continue hands-on dental assistant training.

Other dental students will occasionally view the procedures for educational reasons to continue their learning of dental assistant knowledge and skills as well as all aspects of dentistry. The program's instructor, a dental hygienist, will also give dental care as needed.

Services are available on Fridays from noon to 2 p.m., and appointments are necessary. In order for Sussex Tech students to have an opportunity for an appointment, a medical history, patient registration form, and permission form must be completed and returned to the school.

For more information, contact the Sussex Tech nurses' office at 856-0961 or the school's Wellness Center at 856-4360.

Volunteer dentist Dr. Michael Butterworth of Dagsboro works at the Sussex Tech Dental Clinic during its opening day. Observing is junior Hiten Patel of Georgetown (left) and assisting is junior T.J. Pinto of Milton (right). Watching in the background is teacher Jill Lord.
